Smart Sensors Technology
Live Monitoring, Alerting & Displays

Resinity

Temperatures, Humidity, Location

Integrates with Existing ERP's & CRM's
Secure and Real-time API's available that connect to all leading CRM's and ERP systems

Alerting the Abnormalities
Real-time alerts on text, emails and WhatsApp can be triggered based on defined criteria

LIVE CENTRAL DASHBOARD

25.20   27.11

21.45   25.50

Scalable and Customisable
Diverse range of sensors that work together or independently. The system is scalable to increase with demand and can be customised for specific requirements

Smart IoT Sensors

Smart sensors monitoring environmental factors such as temperature, humidity, acceleration and location in real-time.
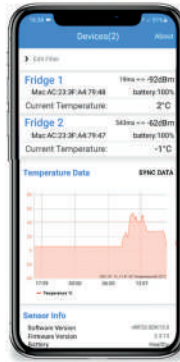

Works with delivery boxes, pallets, chillers, freezers, cold storage, distribution & last mile delivery.

Live monitoring & alerting about abnormalities. Preventing waste.

Smart probes for monitoring preparation, cooking, cooling, & quality control. Recording and notifying abnormalities to staff.

Temperature:-40°C~85°C
